

HOW YOU CAN

# DOUBLE YOUR MONEY ON THE WORLD'S MOST VALUABLE COMPANIES

**TOM GENTILE**

AMERICA'S #1 PATTERN TRADER

# How to Double Your Money on the World's Most Valuable Companies

It may seem impossible to double your money on big-name stocks (like *Apple, Amazon, and Boeing*) when they're often trading at over \$100 per share.

But I'm here to tell you that you can... *without* spending thousands and thousands of dollars to buy just a few shares.

In fact, I'm in position to double my money on big name stocks like these every single week.

And I'll show you how you can be, too.

Even better, follow the way I do things, and you'll never risk more than \$500.

I'll show you a few examples in just a moment. But first, let me tell you about the powerful tool I created that makes it all possible...

I call this proprietary tool *The Money Calendar*.

It analyzes 10 years' worth of historical data on the price movements of the most popular stocks on earth – spotting low-risk, high-return trades based on a simple, back tested pattern.

Not only does it show me short windows of time where a stock consistently goes up or down, for at least nine out of the last ten years... but it also shows me the exact length of time that move lasted.

Below is a screen shot of *The Money Calendar*. Each day of the week shows whether stocks will either rise or fall in price based on ten years' worth of historical data.

The Money Calendar ◦						
14	15	16	17	18	19	20
		Total: 52 Bullish: 34/65% Bearish: 18/35%	Total: 49 Bullish: 33/67% Bearish: 16/33%	Total: 57 Bullish: 23/40% Bearish: 34/60%	Total: 57 Bullish: 28/49% Bearish: 29/51%	
21	22	Total: 73 Bullish: 32/44% Bearish: 41/56%	Total: 55 Bullish: 46/84% Bearish: 9/16%	Total: 55 Bullish: 36/65% Bearish: 19/35%	Total: 64 Bullish: 52/81% Bearish: 12/19%	Total: 84 Bullish: 68/81% Bearish: 16/19%
28	29	Total: 91 Bullish: 66/73% Bearish: 25/27%				5

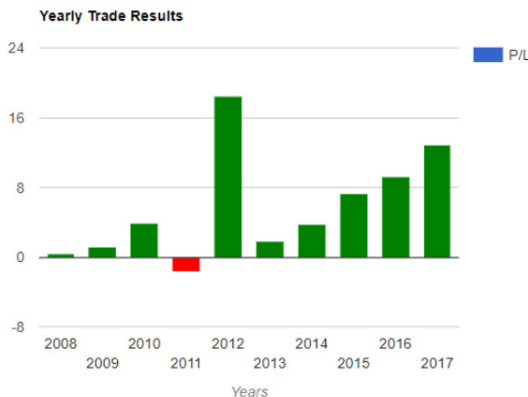

Green days mean that most stocks will be bullish. Yellow days are neutral. And red days mean that share prices will fall.

Now, let me show you how I use The Money Calendar to spot trades designed to double your money in 30 days or less... First, let's start with Apple.

## Apple Inc. (AAPL)

AAPL was trading at \$169 at the time I recommended my trade. That means if you wanted to buy 100 shares of the stock, you would've needed to risk nearly \$17,000 of your hard-earned money to do so.

But the trade I showed my readers let them control 100 shares of stock for just \$177.

And based on the 10-year historical pattern that The Money Calendar gave me, we only needed the stock price to make a small one-point upward move for us to make a 100% gain.

Our trade did even better – netting gains of 130.2% in less than 30 days.

Now, let me show you how I applied the power of The Money Calendar to the world’s largest e-commerce company...

## Amazon.com Inc (AMZN)

This past August, I spotted a trade opportunity on AMZN thanks to my Money Calendar. At the time, the stock was trading around \$1,776.

*And that’s just for one share!*

So if you wanted to buy 100 shares for any less than \$177,600 – you can forget about it!

But without ever buying a single share of stock, my readers controlled 100 shares of AMZN for just \$403.

Here’s how...

The Money Calendar showed me that AMZN made an upward move at the same time nine of the last ten years.

This told me that there was a 90% probability that it would move in this direction again over the trading date range – and that we only needed it to move by a small number of points to hit a double.

In only *seven trading days*, we sold 50% of our position for an 89% profit. Then, just *five trading days* later, we sold the remainder of our holdings for another 115.14% gain!

Look at how one of my readers did:

*“I just made \$1,070!”*

Next, let me show you how you can use this approach on one of the priciest stocks on the market...

## Booking Holdings Inc. (BKNG)

At the time I was interested in a trade on BKNG, the stock was trading at \$1,875. So if you wanted to buy a single share of booking, you’d be out almost \$2,000! And if you wanted 100 shares, you’d have to shell out \$187,500!

But as I said before, I don’t believe in risking more than \$500 on a trade. And this was well over my – and my readers’ – preferred price range.

So here’s what we did...

The Money Calendar showed me that BKNG made an upward move in ten out of the last ten years, as you can see below...

And sure enough, just 27 trading days later, my readers closed out for 148% total gains!

Many of my readers wrote in to tell me how they did – here’s just a few...

*“Another fine win! This is just excellent...”*

*“I made \$2,200 – thanks, Tom! This has completely changed my life...”*

Here’s the last example...

## Boeing Co. (BA)

Based on the pattern that The Money Calendar showed me during mid-September and mid-October, I knew that we only needed a price move of a couple points to get a quick double on BA.

And without buying even one share of BA, my readers got to control 100 shares for only \$383.

In comparison, we would’ve paid over \$35,800 at the time for 100 shares of the stock outright.

And thanks to the accuracy of the patterns the Money Calendar finds, we were able to exit this trade for nearly 100% gains... *less than 20 days* later.

Here’s what some of my readers had to say...

*“I more than doubled my investment because I was able to get in at an even better price. There is no comparison to The Money Calendar...”*

*“I can’t wait to continue investing in these awesome opportunities...”*

Look – there are just a few examples of my big hitters.

I’ll be walking you through my simple trading strategies, breaking them down step-by-step, and showing you how it’s entirely easy to double your money on big-name stocks... all for less than \$500 per trade.

So sit back, relax, and let me “show you the money!”

A handwritten signature in black ink, appearing to read "Tom Gentile". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
